

For the best self-tan results, prepare & maintain

Exfoliate - Pre Tan

Passion Fruit BODY POLISH

Fake Bake Passion Fruit Body Polish is a gentle, but effective exfoliator which leaves the skin feeling silky smooth and ready to tan. It contains the highest concentrations of rare botanicals and Aloe Vera extracts as well as micro particles of the gentle, natural exfoliator Loofah which 'polishes' skin without lacerating or damaging the surface of newly exposed layers. The experience will leave your skin feeling refreshed and energised.

Suitable For: Skin Types - Oily, Normal, Dry
Skin Tones - Fair, Medium, Dark

Moisturise - Pre & Post Tan

Skin Smoothie Oil

Fake Bake Skin Smoothie is a luxurious blend of botanicals and essential oils which moisturise and lock Fake Bake deep into the layers of the skin maximising the life of your tan. This unique dry-oil texture is easily absorbed leaving skin soft and radiant. Fragranced with Passion Fruit, Rosehips and Linden Flower, skin feels refreshed and ultra smooth.

Suitable For: Skin Types - Normal
Skin Tones - Fair, Medium, Dark

Moisturise - Pre & Post Tan with Glisteners

Tan Enhancing Lotion

Fake Bake Tan Enhancing Lotion is specially formulated to increase the life of your Fake Bake tan and condition your skin. Rich essential emollients quickly absorb into your skin to replenish moisture, making it softer and smoother. Mica gives the skin a radiant shimmer. Can also be used to enhance a natural tan.

Suitable For: Skin Types - Oily, Normal, Dry
Skin Tones - Fair, Medium, Dark

Moisturise - Pre & Post Tan

Oil Free MOISTURISER

Moisturisers that contain oil can prevent the absorption of self-tanning products. Fake Bake Oil Free Moisturiser is fast absorbing and provides superb moisturising benefits for the skin without oil. Botanicals Green Tea and Ginger help to promote the soothing effect for sensitive or irritated skin.

Suitable For: Skin Types - Oily, Normal, Dry
Skin Tones - Fair, Medium, Dark

Moisturise - Pre & Post Tan

Oil Free MISTIFIER SPRAY

Fake Bake Oil Free Mistifier Spray leaves the skin silky smooth and hydrated. This easy to apply, fast application contains two anti-oxidants Green Tea and Vitamin E which protect the skin from free radicals. Ginger Root and Aloe Vera soothes sensitive or irritated skin.

Suitable For: Skin Types - Oily, Normal, Dry
Skin Tones - Fair, Medium, Dark

Fake Bake Original was the first self-tan to combine two naturally derived tanning agents DHA & Erythulose for more natural, longer lasting results than a conventional self-tans.

In 2010, Fake Bake introduced a third tanning agent - DMI, a revolutionary 'booster' agent that accelerates Fake Bake's tan development and prolongs the intensified colour beyond anything achieved so far. DHA, boosted with DMI absorbs faster and deeper into layers of the Stratum Corneum where it interacts with the amino acids to turn skin brown. Erythulose works with both agents to reduce streaking and miscolouring for a natural tan.

PARABEN FREE

Pre and post tan products enhance the tan by priming and moisturising the skin for more even, longer lasting results.

The Original Self-Tan Range

Fair SELF-TAN LOTION

Fake Bake Fair Self-Tan Lotion has been specially formulated for people with fair complexions or anyone who wants a subtle glow. The easy glide formula and subtle 'show where it goes' cosmetic guide colour enables even the most inexperienced self-tanner to apply a self-tan with ease and confidence. Contains tanning agents DHA and Erythulose. If you desire a darker tan, Fake Bake Fair Gradual Tan Lotion can be reapplied over consecutive days giving you complete control of your colour development. You will notice colour development after the first application. Includes reusable gloves and step-by-step application advice.

Suitable For: Skin Types - Oily, Normal, Dry

Skin Tones - Fair & people who want a subtle glow

Tanning Virgins - People who aren't confident applying self-tan

Wellness Ingredient - Vitamin D

The experts at Fake Bake have incorporated Vitamin D into the Original Self-Tan Range, mimicking the body's natural ability to create the vitamin through the skin. Vitamin D is naturally produced by your body to when exposed to ultraviolet rays from sunlight striking your skin.

Vitamin D's major contribution to improved wellness is its ability to increase the flow of calcium into the bloodstream linked to:

- Stronger immune system.
- Stronger bones.
- Reduces the risk of developing heart disease (prevents build up of calcium deposits in arteries).
- Regulates insulin levels, thus reducing the risk of developing diabetes.
- Lowers the risk of developing prostate, breast, and bowel cancer, along with 'essential' hypertension, osteoporosis, and tuberculosis.

Vitamin D has also been linked to reducing depression during winter months (combats SAD syndrome).
