Fake Bake Gold is the ultimate luxury self-tan range, reserved exclusively for premium beauty salons and spas. Fake Bake Gold products contain the highest quality, naturally derived ingredients which pamper your skin, leaving it beautifully tanned and conditioned.

The higher concentrations of DHA interacts with the amino acids which lie in the top layers of your skin (the stratum corneum), to develop even more rapidly than our original self-tans. Erythulose develops the tan more slowly for longer lasting results. When combined, these tanning agents work together to reduce streaking and miscolouring for a natural looking tan. They also make your tan fade evenly for a continuously natural appearance.

Fake Bake Gold products contain:

Two of the most powerful anti-oxidants Pomegranate and Stable Green Tea, as well as Vitamins A and E. Oxidants can produce free radicals, which start chain reactions that damage cells. These reactions can weaken the protective immune system and result in thinning skin, a loss of elasticity, age spots and wrinkles. Pomegranate and Stable Green Tea combat these chain reactions by removing free radicals, and inhibit other oxidation reactions.

Gold SELF-TAN LOTION

Fake Bake Gold Self-Tan Lotion is the most luxurious self-tan from Fake Bake. It blends the best quality and highest percentage of naturally derived tanning agents - DHA and Erythulose with two of the most powerful anti-oxidants - Pomegranate and Stable Green Tea, as well as Vitamins A and E. These counter the highly reactive free radicals in the environment which are known to weaken the protective immune system and result in thinning skin, a loss of elasticity, age spots and wrinkles. Fake Bake Gold Self-Tan Lotion contains 'show where it goes' cosmetic colour guide and increased concentrations of tanning agents accelerate tan development, giving you a fully developed tan in 4 to 6 hours.
